Building a Website 2018

the *background*

when we started this class, we
talked about **goals**

our goals are **smart**

- **Specific:** Your goals should be clear, simple and defined.
- **Measurable:** This is where analytics come in. You want a goal that has one or more metrics.
- **Achievable:** Is it achievable or is it not possible within your resources?
- **Realistic:** With your current resources of time and money, is it possible to achieve your goals?
- **Time sensitive:** Every goal needs a time frame, whether it's one year or several months.

- **Specific:** Your goals should be clear, simple and defined.
- **Measurable:** This is where analytics come in. You want a goal that has one or more metrics.
- **Achievable:** Is it achievable or is it not possible within your resources?
- **Realistic:** With your current resources of time and money, is it possible to achieve your goals?
- **Time sensitive:** Every goal needs a time frame, whether it's one year or several months.

if you succeeded at your goal,
how would you know?

YOU
DID
IT!

Web analytics

measurement, collection, analysis and reporting of web data for purposes of understanding and optimizing web usage

[wikipedia.org](https://en.wikipedia.org)

analytics give us **feedback**

the *conceptual*

what does all this data **mean**?

visitors

visitors

how many people
visited your site?

visitors

generally, they try to
count **unique visitors**

visitors

visitors

visitors

sessions

sessions

how many times was
your site **opened**?

sessions

how many times was
your site **opened**?

sessions

900 **sessions**
1 **visitor**

sessions

we **can** know more
information about sessions

sessions

- average **length** (e.g. 30 seconds)
- average **page impressions**
(e.g., 2 pages)

page traffic

page traffic

which **pages** did your users visit?

page traffic

the most popular page is probably
index.html (your landing page)

page traffic

are some pages **more popular**
than others?

origin

origin

where do visitors
come from?

origin

general possibilities:

- **direct** (they typed your site address)
 - **social networks**
 - **search engines**

origin

you can usually see a list of
links and **keywords**

bounce rate

bounce rate

how do they **leave**?

bounce rate

generally **bounce rate** refers to visitors bouncing from your site from the main page

bounce rate

usually shown by a **percentage**

e.g., 13% of visitors left after arriving
at the main page

bounce rate

you can also evaluate other pages
with a **high bounce rate**

system info

system info

information about the **devices**
and **browsers** people are
using to access your site

system info

a lot of my users
this year are on
windows

over **time**

12/31/17 - 08/07/18 Custom ▼

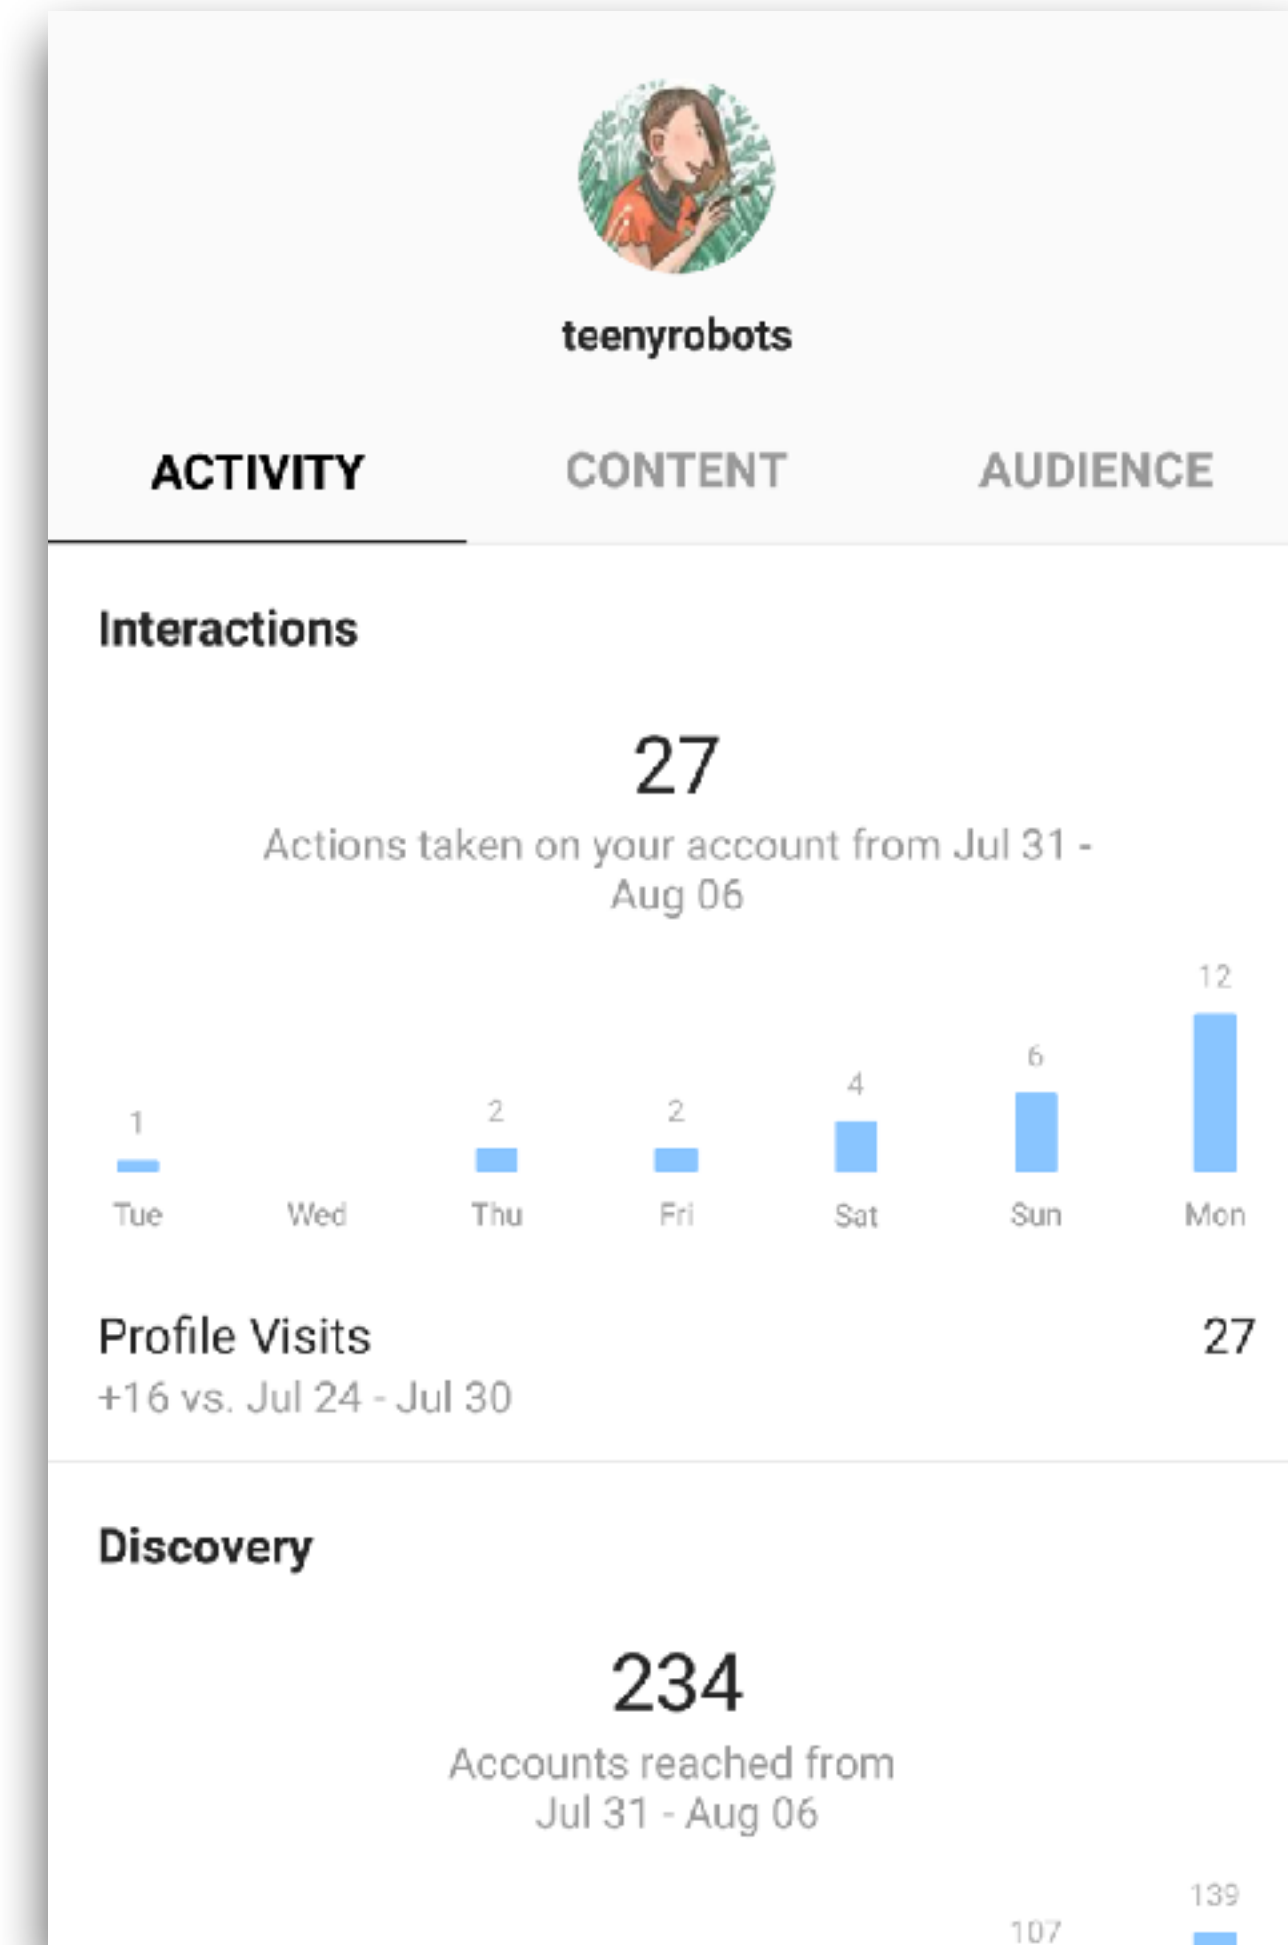

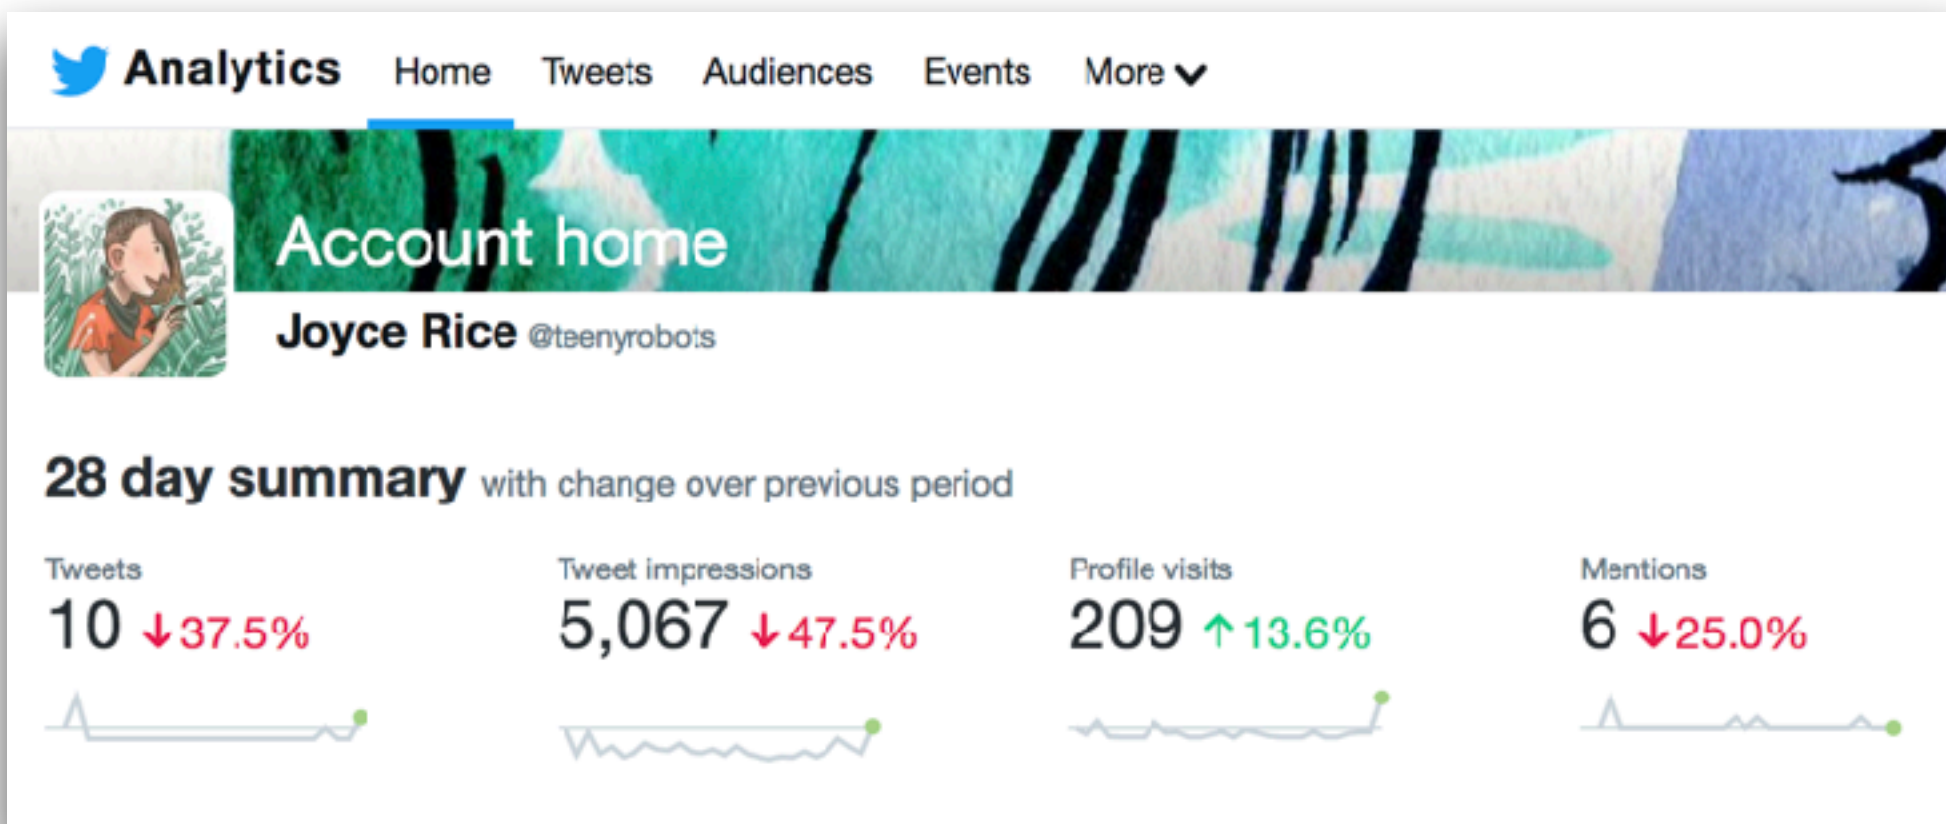

08/07/18	Today
08/06/18	Yesterday
08/01/18 - 08/07/18	Last 7 days
07/09/18 - 08/07/18	Last 30 days
07/28/18 - 08/03/18	Last week
06/30/18 - 07/30/18	Last month
08/04/18 - 08/07/18	Current week
07/31/18 - 08/07/18	Current month

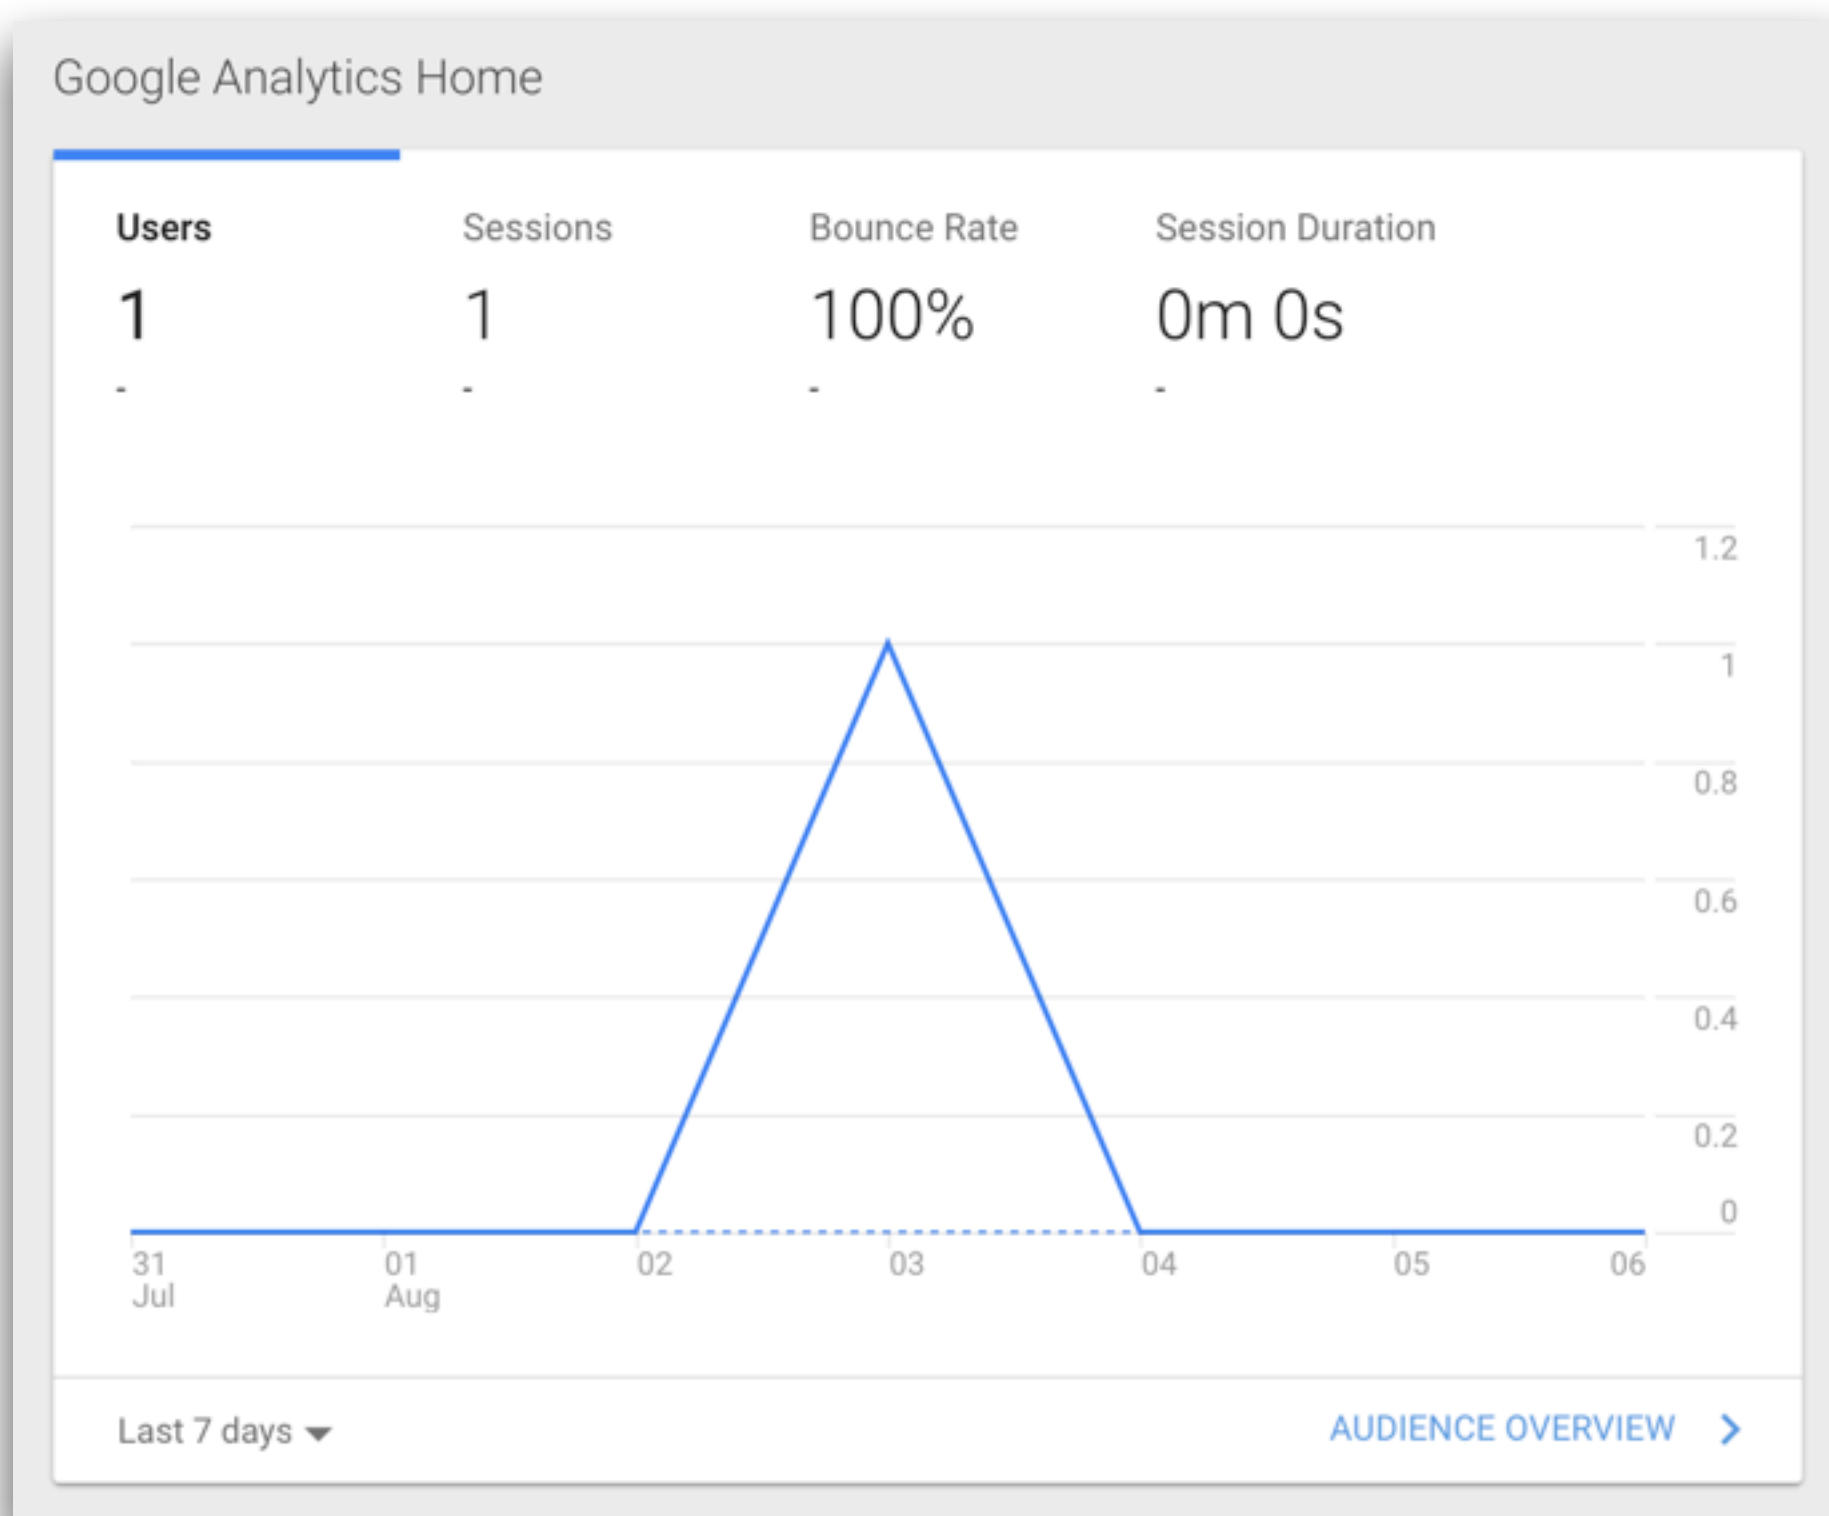

2018-01-01 to 2018-08-08

finally, take it all with a **grain of salt**

the *practical*

data is cool, where do we get it?

Crazyegg
Crazy Egg is an online application that provides a visual representation of how users interact with your website. It uses Scroll map, Overlay, and Confetti to track user behavior and provide a competitive advantage to improve your website.

[Visit Crazyegg](#)

ClickMeter
ClickMeter is a complete and definitive tool for tracking and monitoring the status of all your external links.

[Visit ClickMeter](#)

Piwik
Piwik is a downloadable, free web analytics tool that allows you to track your website and its visitors, including the pages they visit, the language they speak, which pages they visit, and more.

[Visit Piwik](#)

Clicky
Clicky is a complete web analytics tool that provides you with all the information you want about your website traffic. It combines the best of both worlds in a way that is both easy and elegant.

Jetpack

the information **on it's own** is
not really that valuable

- **Specific:** Your goals should be clear, simple and defined.
- **Measurable:** This is where analytics come in. You want a goal that has one or more metrics.
- **Achievable:** Is it achievable or is it not possible within your resources?
- **Realistic:** With your current resources of time and money, is it possible to achieve your goals?
- **Time sensitive:** Every goal needs a time frame, whether it's one year or several months.

all of these services are measuring
actions your users take

our **goal progress** can be
measured by user **actions**

choose the **right metrics** to
evaluate your goal

Joyce's goal

goal: sell 5 graphics to
new clients this year
